

# Virtual Classroom Tour

## Together in a world of learning

Learning beyond the bounds of time and place

“We live in different countries on different continents nevertheless we can learn together in a common digital classroom with teachers from all over the world taking care of each other.”

## Together in a world of learning

Learning beyond the bounds of time and place

### Teacher Planning

- Stimulated by the following studies such as PISA, Bertelsmann, UNESCO we started our project to give also students with a difficult social background the chance of improving their abilities and being personally responsible for the learning.
- Our vision has nearly come true: most of our students will have personal resources for anytime and anywhere learning.
- To reach this great target we developed our digital learning platform with our partners ( Microsoft, Ministry of education, local school authority, IT-companies).
- In the following time we hope to find partner schools all over the world to build a learning community and to have the chance of exchanging our experiences and resources.

**Background & Planning:** A picture of the origin and objectives of the learning project, including the manner in which the project was planned and managed.

**Classroom Images:** Images of the classroom to give you a better feeling for how the project was implemented.

### Assessment and Standards

Our project is transdisciplinary and therefore we cannot define special objectives. Key skills such as working with the media and using information and communication technologies anchored in our curriculum are gaining more importance.

The authors select learning resources and decide how to relate to the curriculum guidelines.

## Together in a world of learning

Learning beyond the bounds of time and place

### The next steps

Finding new ways of collaborating by using:

Skype  
MSN-chat,  
project groups and project weeks across  
the countries,  
school e-learning camps

To get an impression of the variety and complexity of our world of learning, please view our second laptop and try the functionality live.
